

PUBLIC INSURANCE PROGRAMS AND CHILDREN WITH SPECIAL HEALTH CARE NEEDS

A Tutorial on the Basics of

Medicaid and **The Children's Health Insurance Program (CHIP)**

February 2012

Authors: Jill Rosenthal, Mary Henderson, Jennifer Dolatshahi, Catherine Hess (NASHP); and Carol Tobias, Sara Bachman, Meg Comeau (the Catalyst Center)

Acknowledgements

Prior to starting this work, a group of individuals chosen for their diverse perspectives and knowledge met in Boston to provide guidance to us in conceptualizing the learning objectives, structure, and content of the tutorial. We offer our sincere thanks to Gerri Clark (Illinois), Melinda Davis (Alabama), Debbie Cheatham (Georgia), Deb Garneau (Rhode Island), Lesa Walker (Texas), Karen Hylton (Oklahoma), Russell Frank (Vermont), and Neva Kaye (NASHP) for the helpful insights and wise counsel they generously offered us.

Sara Wilson and Sheila Phicil (Catalyst Center) provided valuable research support throughout the development, writing, and formatting of the tutorial.

Sincere appreciation is offered to Susan Epstein, president of New England SERVE, founding member of and current consultant to the Catalyst Center, who provided valuable feedback on the organizational structure of the tutorial, as well as significant enhancements to its content. Additional thanks to Phyllis Sloyer, Director, Division of Children's Medical Services, Florida Department of Health and Lauren Agoratus, Coordinator, New Jersey Family Voices at the Statewide Parent Advocacy Network for their thoughtful review and helpful comments.

The authors are particularly grateful to Edi Ablavsky, Catalyst Center Communications Specialist, who transformed a collection of complex parts into a coherent and friendly whole.

Finally, the Catalyst Center and NASHP extend their appreciation to Lynda Honberg, MCHB project officer, for her ongoing support of this project and the work of the Catalyst Center to promote adequate coverage and financing of care for children with special health care needs.

This work was supported by a contract with the National Academy for State Health Policy (NASHP) and the Catalyst Center: Improving Financing of Care for Children and Youth with Special Health Care Needs at the Boston University School of Public Health, under cooperative agreement #U41MC13618 from the Maternal and Child Health Bureau (MCHB), Health Resources and Services Administration (HRSA), U.S. Department of Health and Human Services (HHS).

TABLE OF CONTENTS

This tutorial gives a broad overview of Medicaid and CHIP, the many different populations these programs serve, the changes they are undergoing under health reform, and some detail to help readers think about opportunities to improve services for CSHCN through communication and collaboration with Medicaid and CHIP staff. The tutorial starts with an overview of how definitions of CSHCN may vary by agency or program, followed by eight major topic areas and then recommendations for steps Title V programs can take to build successful partnerships with public insurance programs.

INTRODUCTION

Why This Tutorial?

According to the National Survey of Children with Special Health Care Needs 2009/10, well over a third of children with special health care needs (CSHCN) depend on Medicaid or the Children's Health Insurance Program (CHIP) for some or all of their health care coverage. Title V of the Social Security Act has a mandate to facilitate the development of community-based systems of care for CSHCN and their families through the state block grant program. There are natural points of connection and opportunities for collaboration between Title V and Medicaid/CHIP, including:

- Providing gap-filling services to publicly insured CSHCN;
- Helping with identification of Medicaid/CHIP-eligible CSHCN and facilitating enrollment;
- Engaging in capacity-building activities that ensure quality health care services are available to CSHCN at the state and local level.¹

Not only is collaboration between Title V and Medicaid/CHIP a good thing in terms of promoting the development of and access to a robust system of care and services for CSHCN, it is also required by several federal statutes and regulations.²

But communication and collaboration between these important programs serving CSHCN is not always easy. In our work with state Title V program staff, we have learned that the complexity of many Medicaid and CHIP rules and regulations, along with unfamiliar vocabulary can create barriers to effective collaboration. We have created this tutorial to help directors, staff, partners and others serving CSHCN increase their knowledge of how both public benefit programs work. A more

Learning Objectives

By completing this tutorial, participants will:

- Increase their understanding of state Medicaid and CHIP programs and policies;
- Review examples of how partnerships can maximize Medicaid and CHIP program capacity to meet the needs of CSHCN;
- Identify specific opportunities to partner with the Medicaid and CHIP programs in their own state.

²Including Title XIX of the Social Security Act §1902(a)(11)(B); the Code of Federal Regulation Title 42 - § 431.615 (Relations with State Health and Vocational Rehabilitation Agencies and Title V Grantees).

INTRODUCTION

in-depth understanding of the program components and policies can help Title V staff build more effective partnerships with their state Medicaid and CHIP programs.

Content Overview

This tutorial gives a broad overview of Medicaid and CHIP, the many different populations these programs serve, the changes they are undergoing as a result of health care reform and some options to help readers think about opportunities to improve services for CSHCN through communication and collaboration with Medicaid and CHIP staff. The tutorial starts with an overview of how definitions of CSHCN may vary by agency or program, followed by eight major topic areas and then recommendations for steps Title V programs can take to build successful partnerships with public insurance programs.

Partnerships in Your State

Each of the eight topic areas (Sections 2-9) describes a component of the Medicaid/CHIP program and a brief description of the regulatory framework for each. It then identifies opportunities for Title V programs to use this information or interact with Medicaid/CHIP programs in this area. A brief set of questions, “Test your knowledge,” is provided at the end of each topic to reinforce the major learning points. An answer key is provided for each so that readers can check their content knowledge. Each topic concludes with a set of inquiries that provides direction for participants to find out more specific information about Medicaid and CHIP in their state.

Section 1: How Do Different Systems Define and Think About Children with Special Health Care Needs?

Section 2: The Basics: What are Medicaid and CHIP?

Section 3: Building Partnerships: What Kinds of Partnerships Between Title V and Medicaid/CHIP Are Required and Feasible to Build?

Section 4: Pathways to Coverage

Section 5: Covered Services: What Will Medicaid and CHIP Pay For?

Section 6: Financing: How Do Medicaid and CHIP Dollars Flow?

Section 7: Service Delivery Models: How Do States Deliver Health Care Services to Children Enrolled in Medicaid and CHIP?

Section 8: Quality Measurement and Improvement

Section 9: What's New Under the Affordable Care Act (ACA)?

Section 10: Next Steps: Making the Case for Successful Partnerships in Your State
